arising from an examination in 1969 of the education and training opportunities for paint industry technicians it was recognized that the various courses available at that time did not fully serve their needs while a few large companies had developed in house training arrangements the many medium and smaller firms in the raw material supply paint manufacturing or paint user industries were unable to provide their own

comprehensive training programs with a view to improving this situation an advisory committee comprising of representatives of the Australian Paint Manufacturers Federation and the Oil and Colour Chemists Association Australia was established to liaise directly with the New South Wales Department of Technical and Further Education as a result plans were developed for the introduction of a special course in surface coatings technology in 1971 conducted by the Sydney Technical College the scope of the course was designed to cover all aspects of surface coatings technology ranging from raw materials and formulations to the production testing evaluation application and use of finished products the course proved to be highly successful and in 1973 a similar syllabus was introduced by the Melbourne School of Painting Decorating and Signcrafts in Victoria in 1980 New Zealand followed suit with a similar course conducted by the Auckland Technical Institute
